Molecular and Cellular Biochemistry:

An International Journal for Chemical Biology in Health and Disease

CONTENTS VOLUME 244, Nos. 1 & 2, February 2003

GUANIDINO COMPOUNDS IN BIOLOGY AND MEDICINE
Dr. Joseph F. Clark

Preface 1
K. Aoyagi, Y. Kuzure, S. Shahrzad, A. Hirayama, S. Nagase and A. Ueda: Inhibition by heparin of protein kinase C activation and hydroxyl radical generation in puromycin aminonucleoside treated isolated rat hepatocytes 3–9
K. Aoyagi: Inhibition of arginine synthesis by urea: A mechanism for arginine deficiency in renal failure which leads to increased hydroxyl radical generation 11–15
S. Nakayama and J.F. Clark: Smooth muscle and NMR review: An overview of smooth muscle metabolism 17–30
B.D. Cohen: Methyl group deficiency and guanidino production in Uremia 31–36
A.K. Bence, V.R. Adams and P.A. Crooks: L-Canavanine as a radiosensitization agent for human pancreatic cancer cells 37–43
T.J. deGrauw, K.M. Cecil, A.W. Byars, G.S. Salomons, W.S. Ball and C. Jakobs: The clinical syndrome of creatine transporter deficiency 45–48
W. Derave, B.O. Eijnde and P. Hespel: Creatine supplementation in health and disease: What is the evidence for long-term efficacy? 49–55
M. Hiramatsu: A role for guanidino compounds in the brain 57–62
A. Hirayama, S. Nagase, A. Ueda, K. Yoh, T. Oteki, M. Obara, K. Takada, Y. Shimozawa, K. Aoyagi and A. Koyama: Electron paramagnetic resonance imaging of nitric oxide organ distribution in lipopolysuccaride treated mice 63–67
J. Boero, W. Qin, J. Cheng, T.A. Woolsey, A.W. Strauss and Z. Khuchua: Restricted neuronal expression of ubiquitous mitochondrial creatine kinase: Changing patterns in development and with increased activity 69–76
T. Kitano, N. Nisimaru, E. Shibata, H. Iwasaka, T. Noguchi and I. Yokoi: Monocarboxylates and glucose utilization as energy substrates in rat brain slices under selective glial poisoning – a ^{31}P NMR study 77–81
M. Greenwood, R.B. Kreider, C. Melton, C. Rasmussen, S. Lancaster, E. Cantler, P. Milnor and A. Almada: Creatine supplementation during college football training does not increase the incidence of cramping or injury 83–88
R.B. Kreider: Effects of creatine supplementation on performance and training adaptations 89–94
R.B. Kreider, C. Melton, C.J. Rasmussen, M. Greenwood, S. Lancaster, E.C. Cantler, P. Milnor and A.L. Almada: Long-term creatine supplementation does not significantly affect clinical markers of health in athletes 95–104
Y. Kurosawa, T. Hamaoka, T. Katsumura, M. Kuwamori, N. Kimura, T. Sako and B. Chance: Creatine supplementation enhances anaerobic ATP synthesis during a single 10 sec maximal handgrip exercise 105–112
S. Nagase, H. Suzuki, Y. Wang, S. Kikuchi, A. Hirayama, A. Ueda, K. Takada, T. Oteki, M. Obara, K. Aoyagi and A. Koyama: Association of ecNOS gene polymorphisms with end stage renal diseases 113–118
A. Ueda, S. Nagase, H. Yokoyama, M. Tada, H. Noda, H. Ohya, H. Kamada, A. Hirayama and A. Koyama: Importance of renal mitochondria in the reduction of TEMPOL, a nitroxide radical 119–124
J. Nikolic, G. Bjelakovic and I. Stojanovic: Effect of caffeine on metabolism of L-arginine in the brain 125–128
M. Komurai, Y. Ishii, F. Matsuoka, K. Toyama, M. Ominato, T. Sato, T. Maeba, K. Kimura and S. Owada: Role of nitric oxide synthase activity in experimental ischemic acute renal failure in rats 129–133
G. Ogimoto, T. Sakurada, K. Imamura, S. Kuboshima, T. Maeba, K. Kimura and S. Owada: Alteration of energy production by the heart in CRF patients undergoing peritoneal dialysis 135–138
C.M. Rembold and C.R. Ayers: Oral L-arginine can reverse digital necrosis in Raynaud's phenomenon 139–141
A. Schulze: Creatine deficiency syndromes 143–150
R.M. Murphy, R.J. Tunstall, K.A. Mehan, D. Cameron-Smith, M.J. McKenna, L.L. Spriet, M. Hargreaves and R.J. Snow: Human skeletal muscle creatine transporter mRNA and protein expression in healthy, young males and females 151–157
M. Tarnopolsky, G. Parise, M.-H. Fu, A. Brose, A. Parshad, O. Speer and T. Wallimann: Acute and moderate-term creatine monohydrate supplementation does not affect creatine transporter mRNA or protein content in either young or elderly humans 159–166
L. Trézl, L. Hullán, Z.M. Jászay, T. Szarvas, I. Petneházy, B. Szende, J. Bocsi, Z. Takáts, K. Vékey and L. Töke: Antagonistic reactions of arginine and lysine against formaldehyde and their relation to cell proliferation, apoptosis, folate cycle and photosynthesis 167–176
D.N. Wheatley, R. Philip and E. Campbell: Arginine deprivation and tumour cell death: Arginase and its inhibition 177–185
